## Profile

Dedicated and innovative Full Stack Web Developer with over 6 years of experience in designing, developing, and optimizing dynamic, responsive web applications. Proficient in a broad range of modern web technologies, with a proven ability to deliver high-quality solutions independently and as part of a team. Passionate about exceeding client expectations through meticulous attention to detail and a commitment to excellence. Eager to contribute my technical expertise, problem-solving skills, and collaborative mindset to drive organizational success and create impactful, user-focused solutions.

## Professional Experience

### JavaScript Developer

October 2024 -

Del Systems

- Maintained and optimized a suite of enterprise management tools for Ad Technology professionals, implementing features such as advanced analytics, push notifications, audience segmentation, and real-time Ad Exchange functionality enhanced by machine learning.
- Contributed to debugging, performance optimization, and scalable feature development to improve application quality and user experience.

### Senior Full Stack Developer

May 2021 - September 2024

Alterset

I worked on one of Australia's largest news portals, contributing to projects ranging from Node.js back-end services to React front-end interfaces and a React Native mobile app. My primary focus was on building, maintaining, and delivering high-quality, performant code to support millions of daily users.

- Maintained and optimized existing code, consisting of several hundred React components and numerous back-end services.
- Led the complete redesign of the application, including implementing a video hub where journalists could upload and display videos. The hub averaged over 100,000 daily views.
- Designed and developed a sports hub providing real-time information for major competitions in football, cricket, and rugby, achieving over 1 million daily users.
- Conducted a comprehensive code performance refactor, improving the application's page speed score by over 300%, significantly boosting user engagement and traffic.

### Web Developer

Jun 2020 - May 2021

First Media Advance

At a blockchain and Web3.0 startup, I focused on web development and team leadership, delivering innovative and secure solutions tailored to the needs of emerging technologies.

- Developed and maintained React.js and Vue.js front-end applications, alongside Node.js, PHP, MySQL, and MongoDB back-end solutions.
- Supported and updated projects built in WordPress, as well as static websites using HTML, CSS, and vanilla JavaScript.
- Led the development of a JavaScript-based decentralized communication application for KaiOS-powered devices, ensuring secure and blockchain-integrated functionality.

### Freelance

December 2018 - Present

### Web Developer

Alongside my full-time roles, I have successfully delivered diverse freelance web development projects, tailoring solutions to meet unique client needs across industries.

- Designed and developed e-commerce web shops, ensuring seamless user experiences and secure payment integrations.
- Built real-time chat applications utilizing modern web technologies to enable efficient and reliable communication.
- Created static websites for business presentations, focusing on clean design, responsive layouts, and optimized performance.
